Description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Applicant argued that one of skill in the art could have known to use any stabilized form of oligonucleotide (e.g., Befort et al, Chem.-Biol. Interactions 9: 181(1974), Miller et al, Biochemistry 20: 1874 (1981), Tennant et al, PNAS 71: 3167 (1974), or Kunkel et al, PNAS 78: 6734 (1981) and/or its refs (22) or (23)). Applicant asserted that these oligos were available and could have been known to be of use in the instant invention (e.g., see page 4, lines 8 ff. of spec.). Exr maintained position and asserted that there is not enough direction in the application as filed to lead one of skill in the art to use any stabilized oligo or to search the literature to find same. Applicant asserted that the statement in connection with Zencovich et al (PNAS 75: 262 (1978), e.g., see proposed amendment at page 8) is ambiguous and does not mean that

(A fuller description, if necessary, and a copy of the amendments, if available, which the examiner agreed would render the claims allowable must be attached. Also, where no copy of the amendments which would render the claims allowable is available, a summary thereof must be attached.)

If a response to the last Office action has already been filed, then applicant is given one month from this interview date to provide a statement of the substance of the interview.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview.

☐ Since the examiner's interview summary above (including any attachments) reflects a complete response to each of the objections, rejections and requirements that may be present in the last Office action, and since the claims are now allowable, this completed form is considered to fulfill the response requirements of the last Office action.

unprotected oligos cannot be used in the claimed method. Applicant further pointed to several references that indicate large amounts of unprotected oligos may be used, the large "dose" overcoming the effect of degradation. Exr indicated that each of these references was published after the effective filing date and that applicant himself did not believe that unprotected oligos would work as evidenced by the referred to statement. Exr maintained position. Applicant intends to file an amendment and declarations and supporting documentation.
